

Exhaust flange KF16

ZÁK. ČÍSLO: 2600 40 0100

It is an additional accessory for rotary oil pumps VR1,5 / 12 and VR1,5 / 21. The KF16 exhaust flange is intended to replace the original exhaust flange with a hose outlet. Thanks to the addition of Flange KF 16, it is possible to connect an oil mist separator to the exhaust. The OOM2 / 16 separator is specifically designed for this pump.

Technické údaje

Connecting flange	KF 16
Height	40mm
Hole	10mm
